Other online programs	3,199
PDF originating from county	0
Non-UOCAVA ballots issued electronically	1,471

##### AutoMark®

Estimated number of AutoMark® voters	0
--------------------------------------	---

#### Category discrepancy explanation

#### EMS discrepancy explanation

On November 8, 2018, 22 challenged ballots where the signature did not match the voter registration were placed with ballots that were no longer challenged & released to count in error. By the time the error was discovered & Elections Manager notified, the ballots had already been counted instead of being held until the voter responded to the signature update letter. 4 voters responded and their ballots were cured. 18 voters did not respond & the Canvass Board determined they did not match & should not have been counted. At the instruction of the Secretary of State's office these voters are accounted for in both the Credited Voters category and Voters not Credited category for the purpose of completing this form. The following changes will be made to the challenged ballot process to ensure this does not happen in future elections: No match letters will be run either at the end of the day or before the start of the next day before coding resumes on the remaining challenged ballots; Each letter will be matched with each ballot coded as a no match or unsigned to ensure the same number of each; Ballots that are released to count will be scanned & a data match will be run in DIMS to ensure no ballots have a challenged code remaining.
