

CHAPTER 9: COMMUNITY BUILDING / PLAN IMPLEMENTATION

9.1 Keyport Community Building

Keyport residents have a strong affinity for their small community and express a desire to maintain the organizational and interpersonal aspects of that the rural village. The value placed in the community goes far beyond the built or even the natural environment and places a great deal of importance upon the social institutions and the importance of the social connections within the community for the foundations of any proposed growth.

The community parades, potluck dinners, picnics, and barbeques that exist in Keyport are the quality of life elements that most new subdivision developments and bedroom communities strive to attain and often lament have been lost in the pursuit of "progress". It is this social component of historic main street / small town quality in Keyport that has persevered through the years, and that Keyport residents fiercely want to protect.

In the Keyport Online Survey, over 90 % of the respondents supported the maintenance of the Keyport's peaceful, quite small town ambiance and they overwhelmingly support the Keyport Improvement Group as the official community organization to interact with local, state, and federal agencies.

9.2 Implementation

The goals and policies set forth in the Keyport Community Plan provide direction for Keyport's growth and change over time. The goals and policies, however, do not specifically describe how they will be achieved. Consequently, more specific strategies that describe how the policies are to be implemented are necessary. This is the purpose of the Implementation chapter of the Keyport Community Plan.

In addition, the County recognizes the need for cooperation in the provision of public services, concurrency requirements and rural resource needs. The goals, policies and implementation strategies of this chapter are intended to guide the future actions of the community. The goals and policies of this chapter will be further accomplished by the implementation of coordinated water system plans, water system management plans, sanitary sewer plans, transportation plans, capital improvement plans, zoning changes and other actions undertaken by Kitsap County.

9.3. Implementation / Community Building GOALS AND POLICIES

Goal 23 Foster an environment that supports the active and meaningful involvement of the community in local, county-wide and regional issues.

Policy Key-45 Ensure that Keyport residents have access in the community to information regarding future land uses and activities.

Policy Key-46 Encourage the support and maintenance of the Keyport Improvement Group to represent the citizens of Keyport in furthering of the Plan's goals and policies.

9.4. Implementation / Community Building Key Projects

Designation and support of the Keyport Improvement Group as the official representative organization.

The Keyport Improvement Group is a non-profit organization set up to represent the interests of the Keyport Community and to assist in the maintenance of the Keyport Central Park and the Keyport Saltwater Park. The organization has historically led the community in matters involving land use, finance, infrastructure, and the interaction with the adjacent Navy installation. The community appears to have confidence the Improvement Group is contentious and unbiased in it's approach to the various issues and stewardship of Keyport. Designation as an official organization and recognition by Kitsap County would

provide the organization with the ability to further pursue partnerships in funding and capital improvement projects.

9.5 Implementation Strategies Matrix

The Implementation chapter compiles key projects from all of the chapters of Plan. Implementation strategies are identified according to chapter of the Plan, the County department or other agency most likely to assume responsibility for implementation; and the priority of the action.

Priority levels are divided into:

1. High – To be implemented in the first five years of the plan;
2. Medium – To be implemented in the second five years of the plan; and
3. Low – To be implemented in the last ten years of the planning period.

The list of implementing strategies also distinguishes one-time tasks from on-going activities. While the list that follows is intended to be complete, other additional tasks may be identified over time.
