Access (check all that apply):
- Public roads – constructed within County right-of-way and to be County-maintained
- Private roads – constructed within private easements or access tracts and to be privately maintained

Section 3 – Density Calculations

Except as provided in KCC 17.382.110(A)(18), density shall be calculated as follows: In all zones where a maximum or base density is identified, maximum or base density is calculated on gross acreage of the site. In all zones where a minimum density is required, minimum density is calculated on net developable acreage. If a calculation results in a partial dwelling unit, the partial dwelling unit shall be rounded to the nearest whole number. Less than .5 shall be rounded down. Greater than or equal to .5 shall be rounded up.

Complete the table below for projects in:
- Urban residential zones; in Urban Restricted zone, the figure shown for #2 in the table shall include the critical area only, not the buffers
- Commercial zones with proposed residential development

<table>
