DIVISION II – DESIGN
ADVANCED ENTRIES ONLY – CLASSES 1 – 13

RULES

1. Some plant material MUST be used in every exhibit. This includes fresh and/or dried plant material. Schedule may determine type and control of its use unless award offered states “designer’s choice.”
2. Exhibitor may enter as many classes in the Design Division as desired unless schedule limits the number of entries, but only one exhibit per class.
3. A design entered in competition must be the work of only one exhibitor and that exhibitor’s name must appear on entry card. Exception: Club Competition & Companion Design classes, club and president’s name must be on the entry card.
4. Plant material used in designs need not be grown by exhibitor unless schedule requires.
5. A single flower or container-grown plant is not a “design.”
6. No artificial flowers, foliage, fruits or vegetables are permitted in the Design Division, or any other division of all Standard Flower Show. Artificial is defined as “imitation” or “copy,” hand-crafted or manufactured, to represent and/or appear as real plant material.
 - a. Silk, plastic, or other imitation plant material manufactured to copy the typical size, color, and/or pattern of real flowers, foliage, etc., and designed to replace the actual living plant material are prohibited.
 - b. Manufactured items simulating plant material in a less than authentic manner, yet serving no other purpose than to appear as plant material, are not to be used in competitive design classes. Examples are singing/speaking flowers, motorized flowers, metallic flowers and foliage.
7. Manufactured items having a basic utilitarian use other than to simulate plant material are permitted.
 - a. Examples of some acceptable items are dinnerware, inspired in design by the form of a vegetable has been created not to replace the actual plant material, but to serve as an interesting piece of dinnerware. (Example: Cabbage shaped soup tureen, apple shaped luncheon plate, etc.), a napkin ring in a floral motif is essentially a napkin ring; a traditional container with three-dimensional flower motif is essentially a container.
 - b. Example of non-acceptable item would be a fountain featuring metal cattails and/or water lilies. Although it is essentially a fountain, its aesthetic value exceeds its utility.
8. Products manufactured from plant material whose natural state as plant material (branch, tree trunk, root, etc.) has been so altered as to be given a new identity and specific name is permitted in all sections, unless disallowed in the schedule. Examples: paper, lumber, bowl, basket, pedestal, frame, base, etc. If section is eligible for Designer’s Choice Top Exhibitor Award, their use cannot be denied in the schedule.
