

REQUEST FOR PROPOSAL 2009-151
Techite Force Main Replacement Project
Construction Management Services

DUE: Tuesday, October 27, 2009 @ 3:00 PM

Scope of Work

Background:

The Kitsap County Wastewater Division is undertaking a project to replace a major conveyance pipeline. We are seeking a qualified construction management team to work with County staff and design engineers in overseeing the selected contractor.

Currently the main southern feed to the Central Kitsap Treatment Plant is a 30-inch Techite force main, reaching north from Paulson Rd. approximately one and a quarter miles, to the plant. The Central Kitsap Treatment Plant is located on the Brownsville Hwy. The existing main is located primarily within private easements and conveys up to approximately 2,000 gpm of wastewater from the Central Kitsap area. The age and structural integrity of this line are of concern and its replacement was recommended in the Kitsap County Wastewater Comprehensive Plan.

The project will consist of the installation of a replacement line of 34-inch HDPE, as well as several appurtenant structures. Due to the fragility of the existing Techite line, the contractor will be limited by the project specifications to a constrained operating zone and to named construction techniques. The existing pipe must be kept in operation throughout construction.

Currently, the project construction is scheduled to begin in early summer of 2010. The design is approximately 60% complete, with easement acquisition underway. A Corps permit will be required due to the impact on wetlands along the alignment and a six-month placeholder is in the schedule for the permitting approval process. It is anticipated that the selected CM team will provide some assistance with design and specification review through the end of this year, and then CM activities would resume when the project is bid. However, bidding may be delayed beyond mid-2010 depending on the timing of permits.

The project may also include the installation of a parallel line: an 18-inch HDPE force main for the future transmission of reclaimed water. Silverdale Water District is currently evaluating this project.

The preliminary engineer's estimate for this project including the reclaimed water line is \$6.5 million.

Scope of Work:

The team selected for construction management would be expected to team with the County project staff, contractor, and engineering designers, to oversee and manage construction of the Techite replacement force main project. It is expected that the construction period will be 6 – 8 months.

Construction management tasks and responsibilities will include:

- Assistance during final design on constructability review and emergency operations
- Oversight of execution of all project plans and specifications
- Oversight of permit compliance issues
- Adherence to project schedule and budget
- Coordination of submittal reviews
- Review and approval of progress payments
- Construction inspection and field engineering
- Documentation of construction progress
- Oversight and management of materials handling
- Preparation of contract change orders, requests for information, submittal logs
- Maintenance of three-week rolling schedules
- Facilitate weekly progress meetings, safety meetings
- Preparation of final punch lists and other close-out materials
- Oversight of preparation of as-builts, photo logs, operations and maintenance manuals

The contract work will be initiated via two separate NTPs – the first this fall for assistance with design and specification review and the second following the completion of permitting, probably next summer.

Selection Criteria:

The Kitsap County Wastewater Division will evaluate all proposals based on the following criteria. Each criteria will be rated on a scale of one to five and an offer will be extended to the firm deemed the most suitable, to submit a more detailed scope of services. Interviews may be held to aid the County in their selection amongst the qualified firms.

- Experience and background of key personnel related to projects of this type – experience with handling techite pipe will be considered an asset to this project
- Demonstrated success with projects of similar size and complexity.
- Approach to project.
- Knowledge of pertinent local, state, and federal regulations
- Experience specific to Kitsap County.
- Organization and project management skills.
- Quality of references.

Three (3) copies of the proposal packet must be received at the address noted below no later than Tuesday, October 27, 2009 @ 3:00 PM. In that event, the County will pay the Contractor only for the costs of services accepted by the County. Upon such termination, the County, at its discretion, may obtain performance of the work elsewhere, and the Contractor will bear all costs and expenses incurred by the County in completing the work and all damages sustained by the County by reason of the Contractor's breach.

SECTION 9. ASSIGNMENT, DELEGATION AND SUBCONTRACTING

SECTION 17. MISCELLANEOUS

- 17.1 **No Waiver.** The parties agree that the excuse or forgiveness of performance, or waiver of any provisions of the Contract, does not constitute a waiver of such provision or future performance, or prejudice the right of the waiving party to enforce any of the provisions of the Contract at a later time.
