Area Overview

Countywide models are for properties located throughout Kitsap County, rather than by neighborhood.

Property Type Overview

Lodging facilities have a variety of services ranging from full service to very limited service, and short term to long term stays. The model definition provided cites the general criteria used to assist in classifying the lodging properties.

Kitsap County has approximately 23 locations with hotel/motel use. Lodging locations have a variety of unit counts per location.

Land to Building Ratio: The national land to building ratio for this property type is n/a. The countywide land to building ratio for this property type is: 1,000 sf:1 unit.

The land to building ratio is used to determine excess or surplus land. Review of zoning requirements such as total lot coverage or parking requirements, as well as topography and easements, must also be considered before calculating value for this land.

Economic Overview: Room rates reported and published on websites show continued growth and recovery from the limited occupancy of the prior year.

Valuation Summary

Approach Used: Income

Analysis and Conclusion Summary: The three approaches to value were considered.

The cost approach was given little consideration in the appraiser's final analysis. Cost approach components such as replacement cost new, effective age, and depreciation are difficult to accurately calculate in a mass appraisal model.

The income approach was selected as the best method for valuing these properties. The data used to develop our current model data was collected from our mail survey, site visits, local sales, national publications, and data supplied for review or appeal.

A market/sales comparison approach uses sale prices of comparable properties to calculate value. The market/sales approach was not applied as Kitsap County lacks sufficient, recent sales.

Strictly investment property. Market rent and cap rate data available. Cost approach may be applicable if all building sizes are known and accurately described. Review of income, vacancy, expense, and publications indicated growth. The one year adjustment for covid restrictions was removed for this year.

Model Calibration

Preliminary Ratio Analysis: Analysis of 3 sales resulted in a mean ratio of 92%, a median ratio of 89%, and a coefficient of dispersion (COD) of 4.49.
