EXAMPLE CONSTRUCTION STORMWATER POLLUTION PREVENTION PLAN (SWPPP) SITE PLAN

GENERAL INFORMATION

The Stormwater Pollution Prevention Plan (SWPPP) shall follow the format requirements of the Revised Edition of the Stormwater Manual (see Section 1.2.2) and shall contain the following information:

1. Plans sheets: Minimum sheet size is 18" x 24", (11" x 17" acceptable for small project SWPPPs where no SDCP is required)
2. Scale: Preferred horizontal scales are 1"=20', 1"=40', or 1"=80' (vertical scale is 1"=100'). (Scale should be as large as plan view sheets can comfortably accommodate.)
3. Locate the Flow Control BMP(s)-Shower on the site plans the locations of any Flow Control BMP Management Practices (BMPs).
4. Erosion and Sediment Control (ESC) BMPs-Silhouetted on the site plans all new development projects require standard BMPs for erosion and sediment control.
5. INDICATE THE EXISTING EROSION AND SEDIMENT CONTROL BMPs. (Only applicable for existing projects.)
6. Other pollutant BMPs indicate on the site map the location of BMPs to be used for the control of pollutants other than sediment.
7. North arrow
8. Existing structures (buildings, parking lots and driveways, etc.) to remain
9. Erosion natural features such as wetlands, streams, slopes and their associated buffers and applicable construction setbacks
10. Name, address, and telephone of the owner, applicant and agent
11. Assessor's Tax parcel number
12. Symbol legend
13. Standard borders and limits of all existing and proposed:
   a. Property boundaries with dimensions
   b. Structures and other impervious surfaces such as driveways, parking lots, tanks, etc.
   c. Roads and right-of-way including roadway and shoulder limits, widening, and road names
   d. Terrestrial, aquatic, and wetland features
   e. Conveyance open space
   f. Public facilities
   g. Other erosion features affecting existing topography or proposed improvements
14. Erosion control limits
15. The location of on-site and adjacent off-site waste treatment systems, such as septic tanks and distribution systems, and on-site and adjacent off-site wells and underground storage tanks, all in accordance with Kitsap County Health Department regulations
16. Proposed limits of trench-disturbing activity
17. Plan dimensions for a stormwater control plan that includes the location of surface flow or off-site and on-site property and for all existing conveyances
18. Existing topography
19. Future grading
20. The phasing of any erosion and sedimentation control work already included on the Plans
21. Areas of potential erosion problems
22. Locations where stormwater discharges to surface water systems causing and upon completion of construction.
