## Washington East Kitsap Nearshore Inventory Pilings

During the Summer and early Fall of 2007, Kitsap County field crews inventoried the Eastern saltwater shoreline and collected a variety of information concerning environmental stressors and conditions.

Another of the features inventoried were Pilings. 448 occurrences of pilings were inventoried, grouped together in four categories as shown in the legend.

This map was created from existing map sources, as well as field inventories of certain shoreline features. Determination of fitness for use lies with the user, as does the responsibility for understanding the accuracy and limitations of this data. While great care was taken in using the most current map sources available, there is no guarantee or warranty as to accuracy as to labeling, placement or location of any geographic features present within this data.
