

Olalla Recovery Center

Olalla Recovery Centers is accessible for those with mobility issues. We are a single-story facility. We do have ramps into the patient dorms that meet ADA requirements. We assess all patients for any accommodations prior to scheduling their bed date to make sure we can meet the patient's needs while here in service. Requests for accommodations are reviewed as well as affected departments to ensure we can adequately address patient needs during the patient's treatment stay with us. All accommodations needed are reviewed on a case-by-case basis as we are limited in some respects. Our facility is an old naval installation, which can pose some challenges for some and thus, we are limited in the accommodations we can offer based upon the constraints of our facility layout, etc.
