Maintenance Providers
For an updated list of providers, visit www.kcowa.us/maint
This listing is not an endorsement of any kind from Kitsap County.
Manage Your Site for Clean Runoff

1. Clean your stormwater system

- Dirty stormwater systems pollute streams and Puget Sound.
- Inspect at least yearly. To find out what your responsibilities are, visit www.kcowa.us/busstorm or call 360.337.5777.

2. Dispose of washwater properly

- Wash floor mats indoors.
- Never hose spills into storm drains.

3. Maintain clean outdoor areas

- Collect or screen washwater when washing your building, sidewalk, or parking lot.
- Never use soaps or chemicals for outdoor washing.

- Close dumpster lids.
- Keep dumpster area trash-free.
- Store food grease properly.
- Store waste drums and barrels indoors or under cover and away from storm drains.
- Use kitty litter or sand to soak up spills immediately and dispose of properly.
- Dispose of hazardous waste properly. Call Kitsap1 at 360.337.5777 or go to www.kcowa.us/sw for safe disposal options.
- Mark drains on your property. Call 360.337.5777 for information.
- Report water pollution. If you see something, say something.

Maintain Your Stormwater System

- Remove debris and trash from grates, swales, and ponds.
- Look into all storm drains, vaults, and tanks. If water is covering the outlet pipe and it is not raining, call to schedule maintenance.
- NEVER enter a catch basin, tank, or vault.
- Replace absorbent pads in oil/water separators yearly and after each spill.
- Keep vegetation in swales 3” - 6” tall.
- For detailed steps on checking sediment depth in catch basins, tanks, and vaults, go to www.kcowa.us/sediment
- Dispose of storm drain sediments properly. NEVER spread them on the ground.

Regular inspections reduce flooding and water pollution. Inspect and maintain facilities at least yearly and clean debris, sediment, and vegetation as needed, especially after major storms.

Contact a maintenance provider to clean catch basins when half full of sediment

Regularly maintained stormwater systems reduce flooding and water pollution. Inspect and maintain facilities at least yearly and clean debris, sediment, and vegetation as needed, especially after major storms.
